

V118-MG V118-DG V318 V318-D

Natural frequency : (1)
11 to 22 Hz

DESCRIPTION

V118-MG and V318 mounts have cast iron cover and base with 4 mountings holes in the base and a central tapped hole in the cover.

The resilient elements are stainless steel wire mesh cushions :

- V118-MG and V318 have two cushions;
- V118-DG and V318-D have three cushions.

APPLICATIONS

This series of mounts have a natural frequency between 18 and 25 Hz and can be used for mounting :

- heavy machinery (grinders, crushers, inclined presses, eccentric presses, printing presses, textile machines).
- rotating machines (motors, generator sets, pumps, etc), which rotate at more than 2000 rpm for V118-DG and V318-D and up to 2500 rpm for V118-MG and V318.
- gantry cranes (structure, cabs, equipment).

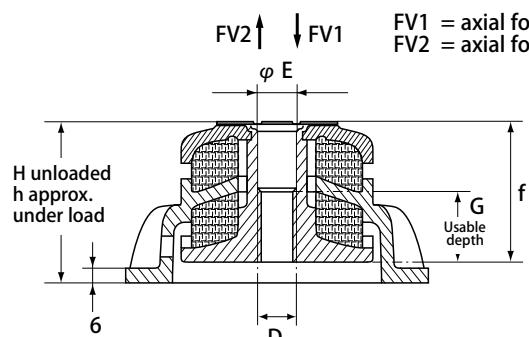

The isometric stiffness characteristics and anti-rebound metal cushions of these suspensions makes them suitable for suspending engines on ships, vehicles, etc.

As they can withstand temperatures between - 70°C and + 300°C, they can also be used for mounting exhaust pipes.
